

Developing my potential

Reflect on your current situation.

1. What do you enjoy in your current situation (work or otherwise)?

2. What is missing? What could be improved?
eg more responsibility, more challenge, less stress, more respect

3. Is there a specific issue or problem currently?

4. How, where and with whom do you best learn?

5. What activities have been undertaken to assess your development needs?

6. What do you see as opportunities for growth?
Consider a range of activities and approaches to account for differences in learning styles.

7. What support do you need to reach your potential?
